

# Observational log CHARA/VEGA 2015-11-04

**Observers:** Frédéric, Orlagh, and Nic  
**Instruments:** VEGA & CLIMB(tracking)

## Configuration:

Telescope	Beam	PoP
E1	B3	P1
E2*	B1	P2
W1	B3	P1
W2	B2	P5
S1	B2	P4
S2	B1	P1

\*E2 not available

## Beginning of the observation:

01.00 Arrived at the control room.

01.00 Humidity still at 100%, Nic left mountain. We are still (too) optimistic, humidity at W2 has dropped to 90% !

08.00 Humidity dropping slightly but still 90% for all telescopes. We are still a little hopeful, W2 at about 85%!

10.00 Not so hopeful anymore.

## End of Night

Time is in UT+00.00, blue.. science target, red.. calibrator, green.. spectral calibration, gold.. additional information.
